

Hepatitis C in prison – 40% to 60% ... and growing

NCOSS conference – Scales of Justice
Sydney 25 July 2002

Stuart Loveday – Hepatitis C Council of NSW

*The Hepatitis C Council of NSW
is a community based,
non-government,
membership organisation.*

*We are primarily funded by NSW
Health to provide information,
support, referral and advocacy
services for all people in NSW
affected by hepatitis C.*

Topics

- Epidemiology overview
- Current status of HCV in NSW
- Current status of HCV in NSW prisons
- *Prisons Hep C Helpline*
- Opportunities

Prevalence of the HCV epidemic - estimates

- **210,000** people living with hepatitis C in Australia ... >1% NCHECR 2001
- 80% (1997) from injecting drugs (**83%**)
- 7% from receiving blood (**5%**)
- 13% from other factors (**12%**)

•Adapted from 1998 Hepatitis C Projections Working Group contained in Lowe and Cotton (1999) *Hepatitis C: a review of Australia's response* Dept of Health and Aged Care

•ANCAHRD Hepatitis C Committee – Estimates and Projections Working Group 2002 – 3rd Australasian Conference on Hepatitis C March 2002

Hepatitis C notifications in NSW 1991 to 2000

Source: NSW Health AIDU Surveillance Section
March 2001

Total HCV notifications in NSW between January 1991 to December 2001:

- **70,036** people diagnosed in NSW
- > 160,000 diagnosed in Australia
- NSW approx 44%

AIDU, NSW Health
June 2002
ANCAHRD Hepatitis C Committee
Estimates and Projections Working Group 2002

Estimates and projections of new hepatitis C infections in Australia

- 1997 – 11,000 people pa
- 2001 – **16,000 people pa**
- **45% increase**
- 91% new infections from IDU

ANCAHRD Hepatitis C Committee – Estimates
and Projections Working Group - 2002

(3rd Australasian Conference March 2002)

Hepatitis C: The Neglected Epidemic

- ***“We are not going to control hepatitis C in the community until we control hepatitis C in the prisons.”***

Dr Nick Crofts, evidence to the Standing Committee on
Social Issues, NSW Legislative Council inquiry into
Hepatitis C in NSW – November 1997

Hepatitis C: The Neglected Epidemic November 1998

Correctional settings Infectious Diseases – 1996 vs. 2001

Marker	Males	Females
Hepatitis B	33% vs. 28%	46% vs. 31%
<u>Hepatitis C</u>	33% vs. 40%	66% vs. 64%
HIV	0.3% vs. 0.1%	1.7% vs. 0%

Tony Butler, Corrections Health Service,
Inmate Health Survey 2002

Education and management

- Department of Corrective Services – AOD, HPU, IDS, peer based
- Corrections Health Service – clinics, public health nurses, care, treatment, management
- Community based organisations

Prisons Hep C Helpline

- “World first” – opened July 2001
- DCS and CHS and HCC NSW
- Funding from DCS – 12 month trial
- Inmates, families, IDS, prison officers
- Smartcard – Arunta phone system
- 7 to 10 minute calls - freecall
- *The Hep C Review*

Prisoners returning to the broader community

- ***Given the large number of people entering and leaving the corrections system each year, custodial settings pose a serious “incubator” threat to both inmates and custodial staff, and upon inmates’ release, to the broader Australian community.”***

National Hepatitis C Strategy 1999-2000 to 2003-2004,
Commonwealth Department of Health and Aged Care

Indigenous Australians

- ***The high levels of Indigenous people in custodial settings is a matter that places this population at particular risk of hepatitis C infection***

National Hepatitis C Strategy 1999-2000 to 2003-2004,
Commonwealth Department of Health and Aged Care

The link with the broader community

- ***“The failure to reduce the risk of hepatitis C and other blood-borne viral infection in prisons severely undermines the work being conducted in the community with injecting drug users”***

Australian National Council on Drugs – Needle and
Syringe Programs position paper – March 2002

Opportunities ...

- **Diversion – keep people out of prison**
- **National models for HCV Prevention and Care**
- **Bleach/detergent**
- **Methadone**
- **Tattooing?**
- **ANCD position on NSP**

Opportunities ...

- ***Rec 12 “...that each jurisdictional department responsible for the management of prisons and juvenile detention centres ...develop ... policies, protocols and procedures regarding the introduction of trial needle and syringe programs within at least one of its prisons and juvenile detention centres.”***

Australian National Council on Drugs – Needle and Syringe Programs position paper – March 2002

Conclusion

- **Keep people out of prison**
- **Introduce more “community equivalent” strategies**
- **Continue to work towards more coherent throughcare**
